CAPCOA PERMITTING WORKSHOP

Course #330

This three-day workshop focuses on state-wide training for air district permit services staff. Day one focuses on common stationary sources and controls and provides an overview of the permitting process including New & Modified Source Review (NSR), BACT review, Offsets & ERCs, Title V & Federal NSR. Participants will also be introduced to common prohibitory and source specific rules as well as New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS). Day two focuses on application review and effective permit writing, risk management, state-wide control programs and compliance considerations. Day three focuses on advanced topics like CAM, HARP (Hotspots Analysis & Reporting Program) risk management training for senior air district permit services staff. **Please note that this class is limited to Government employees only.**
